

Present a Multimedia

Phosphoric Acid Training Manual

On the occasion of the AIChE Central Florida Chapter Meeting at Clearwater, Florida, June 2003, KEMWorks and AleffGroup have the pleasure of announcing the pre-publication presentation of their first multimedia co-production, Phosphoric Acid Training Manual. The program is available in both CD and web-based formats.

The Phosphoric Acid Training Manual has four substantial sections:

Phosphate Chemistry
Plant Performance
Process Description
Process Control.

The program offers many extra resources, such as **photographs, related publications, video clips** and a **glossary**. A **search** facility enables rapid information retrieval.

This is number one of an occasional multimedia series the two companies will be producing for the phosphate and related chemical processing industries under the rubric **Leonardo**.

KEMWorks and AleffGroup welcome enquiries about commissioned programs, collaborations or customizations for particular companies or plants.

Phosphoric Acid Training Manual, ISBN No. 1-903-32239-1

General Editors: Neil Greenwood, Chuck Snyder, Marten Walters

Lead Developer: Dr. Colin Pickup

Program Consultant: Dr. Julian Hilton

Executive Producer: Dr. Malika Moussaid
